

MK™ H40+Dispenser

IMPROVED LOOK & FEEL, FOR LONG-LASTING PROFESSIONAL PERFORMANCE

 medmix

INDUSTRY

U-shaped opening with easy cartridge fit and increased MIXPAC™ cartridge range compatibility

360° rotating frame for uninterrupted handle orientation to access hard-to-reach areas

Robust aluminium handle & durable steel frame construction designed for reliable, single-handed dispensing

Trigger-integrated brake release with anti-drip mechanism for precise flow control and application performance

Model shown: H40+ 310mL

IMPROVED LOOK & FEEL, FOR LONG-LASTING PROFESSIONAL PERFORMANCE

THE NEW MK™ H4O+ IS THE FIRST OF A NEW GENERATION OF MK 1-COMPONENT, MANUAL DISPENSERS THAT BOASTS ITS TECHNOLOGICALLY-ADVANCED DESIGN.

The MK H4o+ dispenser benefits from a new ergonomic design for faster and easier professional dispensing, out-performing both its predecessor (H4o) and other similar models. It is the perfect device for applying adhesives and sealants in remote locations or tight spaces, where compressed air and battery options are not appropriate or available.

The robust aluminium handle and steel frame construction – already existing in the H4o model – now include easy clean, epoxy-coated components with a long-life span mechanism designed for durable and reliable performance.

Whilst maintaining full compatibility with the classic range of 310mL, 1-component cartridges, the new universal frame design, now containing a U-shaped opening for easy cartridge fit, can accommodate other cartridge systems such as MIXPAC™ New Peeler™ or Mixpeel™.

Combining some of the best ergonomic elements of the range, the lightweight aluminium handle in the new MK H4o+ allows for easy and comfortable single-handed dispensing. Performing in the most demanding of dispensing environments, the 360° rotating frame allows users to access hard-to-reach areas.

One of the new features in this dispenser is its trigger-integrated brake release for faster control of the bead. The new single hand grip operation produces even and consistent dispensing control throughout, resulting in a smoother, more precise application performance.

The design of the MK H4o+ dispenser is proprietary and protected and strictly follows the MK recognized standards that ensures the best combination between style and function.

Feel the Innovation.

FEATURES

- Single hand grip dispensing operation
- Ergonomic handle
- Trigger-integrated brake release with anti-drip mechanism
- 360° frame rotation
- U-shaped opening cartridge holder
- 2-Year warranty

BENEFITS

- Smoother, more precise bead application
- User comfort in all dispensing applications
- One-handed control for fast and precise dispensing
- Uninterrupted handle orientation adjustments to access hard-to-reach areas
- MIXPAC™ New Peeler™ or Mixpeel™ 2-component co-axial and 1-component cartridge fit
- Reliable performance
