

# MK™ H40+ Dispenser

IMPROVED LOOK & FEEL, FOR LONG-LASTING  
PROFESSIONAL PERFORMANCE

 medmix

INDUSTRY

Model shown: H40+ Combi

Model shown: H40+ 310mL

Easy to change plunger and increased MIXPAC™ cartridge range compatibility

U-shaped opening with easy cartridge fit and increased MIXPAC™ cartridge range compatibility

Robust aluminium handle & durable steel frame construction designed for reliable, single-handed dispensing

360° rotating frame for uninterrupted handle orientation to access hard-to-reach areas

Trigger-integrated brake release with anti-drip mechanism for precise flow control and application performance

## IMPROVED LOOK & FEEL, FOR LONG-LASTING PROFESSIONAL PERFORMANCE

### EXPERIENCE THE NEW MK™ H40+ DISPENSER RANGE, INCLUDING THE H40+ FOR CARTRIDGES AND THE H40+ COMBI FOR FOIL PACKS.

The MK H40+ dispenser range benefits from a new ergonomic design for faster and easier professional dispensing, outperforming both its predecessor (H40) and other similar models. It is the perfect device for applying adhesives and sealants in remote locations or tight spaces, where compressed air and battery options are not appropriate or available.

The robust aluminum handle and steel frame construction includes easy clean, epoxy-coated components with a long-life span mechanism designed for durable and reliable performance.

The new universal frame design now includes a U-shaped opening for easy cartridge fitting, making it compatible with a range of cartridge systems such as MIXPAC™ New Peeler™, MixPeel™ and the classic range of 310 mL 1-component cartridges.

Combining some of the best ergonomic elements of the range, the lightweight aluminum handle in the new MK H40+ provides easy and comfortable single-handed dispensing. Performing in the most demanding of dispensing environments, the 360° rotating frame allows users to access hard-to-reach areas.

One of the new features in this dispenser is its trigger-integrated brake release for faster control of the bead. The new single hand grip operation produces even and consistent dispensing control throughout, resulting in a smoother, more precise application performance.

The design of the MK H40+ dispenser follows strict MK recognized standards to ensure the best combination between style and function. This unique design is proprietary and protected.

While the H40+ has an open tray for using with cartridges, the H40+ Combi features a barrel for using either cartridges or foil packs. Both are lightweight and ergonomically designed for ultimate comfort and ease of use.

Order a sample – test it – feel the innovation!

### FEATURES

- Single handed dispensing operation
- Ergonomic handle
- Trigger-integrated brake release with anti-drip mechanism
- 360° frame rotation
- U-shaped opening cartridge holder
- 2-year warranty
- Aluminum barrel version for sausage packs

### BENEFITS

- Smoother, more precise bead application
- User comfort in all dispensing applications
- One handed control for fast, high precision dispensing
- Uninterrupted handle orientation adjustments to access hard-to-reach areas
- MIXPAC™ New Peeler™ or MixPeel™ 2-component coaxial and 1-component cartridge fit
- Reliable performance
